

SIZE GUIDE

MEASURING THE FOOT:

- 1) Place your bare foot on a blank piece of paper and draw an outline around it. To get the most accurate measurement, keep the pen/pencil in a vertical position when drawing so you do not draw under the foot.
- 2) Remove the foot from the paper and measure the drawing from the tip of the tallest toe, to the heel.
- 3) Compare the measurement with the table below.

* For half size, you should order the next full size up. If this is your case you can try with an insole. This might compensate for half a number in shoe size. Footshape is very individually. This measurement chart is only for guiding.

length of foot (mm)	221/ 227	228/ 233	234/ 240	241/ 246	247/ 252	253/ 259	260/ 265	266/ 272
length of foot (in)	8.70/ 8.95	8.96/ 9.19	9.20/ 9.47	9.48/ 9.70	9.71/ 9.94	9.95/ 10.21	10.22/ 10.45	10.46/ 10.70
